THE POWER OF TEAMS

Queen’s Master of International Business utilizes an innovative approach to team-based learning that is far more sophisticated than that used in other programs. We believe strongly in our team-based approach because it mirrors today’s progressive workplace. You will leave the program with a thorough understanding of the best practices for successful team-building and teamwork, well-prepared to be a valuable member of a high-performance team.

Understanding the Power of Teams

While other programs talk about “teamwork”, what they are actually referring to is “group work” – a very different concept. At Smith School of Business, you are assigned to a team for the core of the program, and a significant portion of your overall grade is derived from teamwork. Team members collaborate on assignments, projects and presentations, drawing on the skills and experience of individual team members, greatly enhancing the learning experience.

Learning Teams

Each Learning Team consists of 6-8 students. Teams are carefully assembled to maximize diversity of gender, academic experience, and cultural background – reflecting the reality of today’s working environment.

Developing Your Team and Leadership Skills

One of the greatest benefits of our team-based approach is the opportunity to develop your team and leadership skills – skills that are essential in business. At Smith you don’t just learn about teamwork and leadership, you put them into practice every day. Each team member is given many opportunities to lead projects or contribute to projects led by other team members.

“Queen’s MIB program allowed me to gain a solid understanding of what it really means to be part of an international team. The program, which I was able to tailor to my own areas of interest, provided me with highly transferable skills, knowledge and a global mindset that have proven to be advantageous in working toward my career goals.”

SINGLE DEGREE OPTION

The single degree option enables you to earn a Queen’s Master of International Business degree in 12 months. The program is structured in three stages, and a major team-based project spans all three. The second stage of the program provides an international exchange at one of our more than 40 international business school partners.

“Coming into the program I was very excited about team-based learning, however I never imagined that it could be as transformational as it was. The world-class MIB program introduced me to knowledgeable individuals in the Queen’s alumni network who provided me with their professional expertise. With the numerous management consulting projects in the program, I was able to develop a deep intercultural competence when working with global clients. Additionally, the MIB program provided me with the tools to be an effective member of a high performing team at work.”

DOUBLE DEGREE OPTIONS

This program offers several opportunities to earn a second Master’s degree. Double degree options provide additional learning and a much broader perspective compared to the single degree option.

Why Choose a Double Degree

Having a second degree from an international business school will differentiate you from graduates of other business programs. If you envision yourself working in other countries or for multi-national organizations during your career, a double degree option will provide you with the global insight and experience recruiters are looking for. Even if you don’t plan to work outside of your home country, the international experience gained from a double degree option will help you better understand and collaborate with your future colleagues, business partners and customers around the world.

Double Degree Partners

Our double degree partners are among the best business schools in the world. Each of these institutions is accredited, highly internationalized, and highly ranked. We currently offer ten double degree options. These options vary in duration, courses required, electives offered and the degree that is granted. A summary is provided on the following pages, with more details available on our website ssb.ca/mib.

Other benefits of a double degree option include:

- The opportunity to earn two master’s degrees in less time and for considerably less money than it would take to earn them separately
- The benefit of career support from both universities
- Access to the alumni organizations of both universities and an invaluable international professional network
- Participation in internships or business projects
- The opportunity to develop functionality in a foreign language (available in some of the double degree options)
- Ability to specialize and build expertise in a particular region or discipline via Smith’s extensive partner network

“Queen’s Master of International Business in combination with WU Vienna’s Master in Strategy, Innovation & Management Control gave me the perfect educational foundation for an international career. The MIB program stands out for its very practical courses, unique diverse environment, individual career-coaching and an extraordinary team-based approach. The skills I acquired during my time at Queen’s prepared me for the challenges I am now facing every day in an international and fast-moving environment at P&G Canada.”

“Two master’s degrees, three business schools, and one life-changing journey. I have had the opportunity to study both business theory and its practical application on three continents through the double degree program.
