Graduate student supervision - PhD theses and summer research project topics: workarounds, knowledge sharing, governance of open source system development projects, mental models of ISD project members, faultline diversity in virtual teams, knowledge sharing in Software-as-a-Service environments; MSc theses topics: reputational effects in OSS teams, knowledge sharing in charities, conflict in virtual negotiations, cultural diversity on virtual teams, balanced scorecard use in knowledge-based enterprises, developing an intelligent automated procurement system with Internet technologies; MIR thesis: performance evaluation of teleworkers; several

SANDY STAPLES

executive MBA 891 and 992 student projects.

Participated in the Masters of Global Management program, the MBA Science & Technology program and in IT and HR executive development programs.

November, 1998 to present

Research Fellow: Department of Information Systems, University of Melbourne, Melbourne, Australia

Teaching responsibilities were:

615-610, Research Methodology (graduate level), 1 Semester, 1997 (co-taught) and 1998

615-611, Themes in IS Research (graduate level), 1 Semester (co-taught) 1997

Graduate student supervision: one Honours thesis on business process reengineering completed, started the supervision of one Masters thesis on computer-based training, and one PhD thesis on virtual teamwork, but these were not completed by the time I left so others took over the supervision role.

1996 to 1998

Lecturer: Melbourne Business School, University of Melbourne:

I co-taught the Information Systems 351-634 subject in the MBA Program.

1998

Instructor: Melbourne Business School, University of Melbourne:

I taught Information Systems Labs for the IS course in the Core MBA Program.

1997

Instructor: Management Information Systems, Course 02672, Department of Agricultural Economics and Business, University of Guelph. I developed and taught an introductory MIS course in the University of Guelph's MBA program.

Summer, 1995

Ad-hoc Reviewer for various journals and conferences including MIS Quarterly, Information Systems Research, Management Science, Academy of Management Review, Academy of Management Journal, Organization Science, IEEE Transactions on Engineering Management, Small Group Research, Information Systems Journal, Group Decision and Negotiation, Journal of Management Information Systems, Journal of Strategic Information Systems, Information and Organization, European Journal of Information Systems, Journal of End-User Computing, DATABASE, Communications of the AIS, Communications of the ACM, Journal of the AIS, International Journal of Conflict Management, the International Conference on Information Systems (ICIS), Americas Conference on Information Systems (AMCIS), the Academy of Management annual conference, the Hawaii International Conference on System Sciences (HICSS) and the Information Systems Division of the Administrative Sciences Association of Canada (ASAC).

1994 - present

Assistant Course Director: "Managing Information Technology Effectively" short course presented by The Canadian Information Processing Society at the Western Business School, The University of Western Ontario.

June 1994 & 1995

Completed 'The Theory and Practice of University Teaching' course, Graduate Studies, The University of Western Ontario.

Summer 1994

Research Assistant: Western Business School, UWO. I worked on a research project on Visual Interactive Modelling. I developed a spreadsheet-based linear program aimed at providing the power of linear programming in managerial terms. I wrote a teaching case on risk analysis for use in an introductory Management Science course.

Summer & Fall 1993

INDUSTRY WORK EXPERIENCE

General Manager: Boundary Layer Wind Tunnel Laboratory (BLWTL), UWO. I managed the operations of a world-renowned research and industrial wind engineering laboratory with an annual operating budget of approximately \$2 million and 25 full time staff. Over 90% of the contract work was from international sources. I worked to increase the accountability of staff, tighten control on expenses, and increase marketing efforts, which resulted in a substantial improvement in financial performance over the previous year. I also assisted in setting and carrying out the research direction of the BLWTL.

1991 to 1992

Manager and Research Associate: The Centre for Studies in Construction, UWO. The Centre was a multi-disciplinary unit set up to develop educational and research activities to meet the construction industry's needs. I supervised student projects, carried out research projects, investigated and prepared grant applications, developed and maintained databases, prepared newsletters, supervised staff, organized short courses and workshops/conferences, managed financial and administrative matters, coordinated communications with the industry and the Centre's Advisory Board, and coordinated fundraising activities. This position was shared with my BLWTL position.

1990 to 1992

Coordinator, Research & Industrial Applications: Boundary Layer Wind Tunnel Laboratory, UWO. I carried out various marketing and general administrative duties including: preparing wind engineering research proposals for government agencies and for industrial clients from around the world, coordinating contractual issues, identifying and pursuing possible funding sources (both private and government), strategic planning, and acting as an internal consultant on personnel, financial and communication matters.

1987 to 1990

District Landman: Surface Rights Department, Dome Petroleum Limited, Grande Prairie, Alberta. I negotiated new leases and lease renewals with landowners in the Peace River area to use their property for oil and gas exploration (e.g., wellsites and pipelines). This involved working through various arbitration legislative boards when necessary, and handling landowners' issues.

1984 to 1985

Site Supervisor: Frontier Construction Department, Canadian Marine Drilling Limited, Beaufort Sea. As part of the project management team for offshore construction projects in the Beaufort Sea, my duties grew from supervisor of one vessel to site manager of island construction. An island project involved several vessels, roughly 200 people, and had an overall cost of between \$30 to \$100 million.

1981 to 1984
